WORK EXPERIENCE

Front-end Developer

Approveage Inc - Toronto

Feb 2024 - Aug 2024

- Built a Broker Dashboard with Next.js, TypeScript, and TailwindCSS for managing broker operations.
- Integrated real-time updates using Socket.IO for instant document review.
- Secured the platform with Firebase Authentication and implemented Cloud Messaging for notifications.
- Enabled brokers to review, approve, and upload documents.
- Optimized data fetching and caching with Tanstack Query, improving dashboard performance.
- Managed project workflows using Jira, ensuring smooth coordination and timely delivery.

PROJECTS

Approveage Broker - Broker Management Dashboard

[Live](#)

Technology: Next.js, Shadcn/ui, Tailwind, Context api, socket.io, firebase

- Developed a dashboard for brokers to manage operations and upload documents.
- Implemented Socket.IO for instant notifications on client submissions.
- Integrated Firebase Authentication for secure user management.
- Utilized Tanstack Query for efficient data fetching and improved loading times.
- Designed an intuitive UI with TailwindCSS and Shadcn/ui for enhanced user experience.

BloodHero | Blood Donation Application (mobile focused)

[Live](#) | [Client](#) | [Server](#)

Technology: Express, Next.js, Mongoose, Shadcn/ui, Context api, Axios, JWT

- Developed a web app for patients to search for blood and request donations.
- Enabled donors to register and add their donation availability.
- Created an admin panel for reviewing, approving, or declining donation requests.
- Implemented a search system for patients to find donors by blood type and location.

Jobs Hub | Job Portal

[Live](#) | [Client](#)

Technology: React, Tailwind CSS

- Developed a responsive UI for a job portal, enhancing user experience.
- Designed visually appealing layouts for job listings and application pages.
- Created an intuitive navigation system for easy access to portal sections.
- Ensured mobile responsiveness for optimal viewing on various devices.
